

# Remember When Moving Freely Was Easy?

## Let's work towards that freedom again!

**The FDA-cleared Stimel-03 is designed to help you regain movement after a stroke, an injury, or other health challenges. It's straightforward to use and supports your journey to becoming stronger each day.**

With the Stimel-03, you can start taking steps towards moving like you once did. This device uses advanced technology to specifically target and strengthen your muscles, enhancing your coordination and accelerating your recovery. Its compact and portable design allows you to use it both at home and on the go, making your path to independence flexible and convenient.

**Here's how the Stimel-03 can help you regain your freedom:**

- **What is the Stimel-03?**

The Stimel-03 is a state-of-the-art rehabilitation device that aids recovery by boosting muscle strength and enhancing the communication between your brain and muscles.

- **How can the Stimel-03 help after a stroke?**

Regaining muscle control and strength is crucial after a stroke. The Stimel-03 is designed to restore movement and coordination in muscles that have weakened or become paralyzed, thus significantly enhancing your recovery.

- **Is the Stimel-03 suitable for all ages?**

Absolutely! Whether you're a young adult recovering from a sports injury or an older adult aiming to maintain mobility, the Stimel-03 adjusts to suit various age groups and physical conditions.

- **Can the Stimel-03 reduce my recovery time?**

Yes, by integrating several therapeutic techniques, the Stimel-03 can shorten your recovery period, allowing you to see improvements faster than with traditional single-therapy methods.

- **What makes the Stimel-03 unique compared to other devices?**

Unlike other devices that may offer only one form of therapy, the Stimel-03

employs a combination of strategies to provide a comprehensive rehabilitation experience, addressing both muscle reactivation and neural adaptation for complete recovery.

- **Will I be able to use the Stimel-03 at home?**

Yes, the Stimel-03 is designed for easy use, whether in a clinic or at home. Its user-friendly interface and safety features make it ideal for daily use with minimal supervision, reducing the need for frequent visits to healthcare facilities.

- **How does biofeedback enhance my rehabilitation with the Stimel-03?**

Biofeedback acts like a personal coach by providing instant feedback on how you move. It supports retraining brain-muscle and neuromotor nerve connections, helping you understand and control your muscles better. This makes each therapy session more effective, especially when you see your limbs move. Your brain is retraining while mimicking observed actions and motions without any fatigue.

- **Can the Stimel-03 help with conditions other than stroke?**

Definitely! The Stimel-03 is also effective for recovery from surgeries, sports injuries, and managing neurological conditions like multiple sclerosis or cerebral palsy.

- **What are the long-term benefits of using the Stimel-03?**

Using the Stimel-03 regularly can lead to stronger muscles, better coordination, and increased flexibility and mobility—resulting in greater independence.

- **How do I get started with the Stimel-03?**

At your therapist, physician, or other medical personnel should sign the prescription required to proceed with acquiring the Stimel-03. The most economical way is to rent directly from the manufacturer at a very reduced price.

- **How do I order the Stimel-03?**
