Recovery Starts with You

Advanced Neuromuscular Rehabilitation with Stimel-03

Biofeedback-driven, patient-specific therapy for all conditions. When movement feels impossible, your body still holds the signal to recover. **Stimel-03** reads your own muscle activity (EMG) and responds instantly, delivering precisely timed electrical stimulation to help your muscles relearn how to move.

Clinically proven to:

- Re-educate muscles and restore voluntary control
- Prevent atrophy and stiffness
- Improve balance, coordination, and mobility
- Accelerate neuroplastic recovery after stroke or injury

Effective for:

Stroke, hemiplegia, spasticity, post-surgical recovery, gait rehabilitation, facial palsy, and neuromuscular disorders.
