The Science of Relearning Movement

BioRhythmIQ Technology for Neuromuscular Re-education

Stimel-03 integrates **Functional Electrical Stimulation (FES)**, **Neuromuscular Electrical Stimulation (NMES)** and **Real-time EMG biofeedback** in one intelligent system.

It creates a closed feedback loop between patient intention and muscle activation, strengthening the pathway of recovery.

Proven in clinical use for:

- Stroke rehabilitation and early intervention
- Spasticity reduction and range-of-motion training
- Post-surgical recovery (ACL, shoulder, hip, knee)
- Gait and balance improvement
- Facial palsy rehabilitation
